

Butler AI: Master Visual Prompt & Defensive Handoff Guide

Scope: OnSpace.ai / React Native Expo (NO WEB FILES) | **Author:** Manus AI

1. Executive Overview & Strict Constraints

This manual establishes mandatory architectural and visual standards for Butler AI. The application is strictly exclusive to **OnSpace.ai / React Native Expo**. All web files (`.html`, `.css`, web static exports) are strictly prohibited and must be instantly removed.

2. Visual Styling & Responsive Centering Specifications

- **Cyberpunk Dark Aesthetic:** Obsidian backgrounds (`#0a0f18`), glowing cyan/teal neon borders (`#00f0ff`), and crisp glassmorphism cards.
- **Universal Centering & Auto-Resizing:** All UI containers, headers, and buttons must use flexible flexbox centering (`flex: 1`, `alignItems: 'center'`, `justifyContent: 'center'`) that instantly adapts to any mobile screen size or resolution.
- **HUD Telemetry & Dock:** Top status bar showing self-hosted zero-cloud status, animated branding, clock, and security badge; bottom navigation dock for CORE, LIB, BTLR, KB, MONI, SKIN, TOOLS, CFG.

3. Complete API Endpoint Reference

Endpoint	Method	Purpose
/api/health	GET	Server health and version check
/vault/unlock	POST	Unlocks Hardened Memory Vault with PIN
/scripts/create	POST	Validates AST syntax and trust scan
/recovery/panic	POST	Triggers fail-closed security circuit
/api/leaderboard/chat	POST	Submits achievement scores and chat

4. CHECK LAST — Final Verification Protocol

Before completing any coding task, verify:

1. **Zero Web Files:** Confirm no HTML/CSS files exist.
2. **Responsive Centering:** Verify UI flexbox alignment across screen sizes.
3. **Type Safety:** Run `pnpm exec tsc --noEmit`.
4. **Unit Tests:** Run `python3 -m unittest discover -s server -p '*_test.py'`.
